Dear Sir .

I am a landowner just below and joining Hoffman-Taff on the north ,
I have just been contacted by them in regard to a permit application
for the purpose of discharging waste water into Spring River of
which a part runs across my property, and has it badly polluted.

In my study of this application I don't find where a joining land
owner has any voice in such application. and I think they should have
and also, be contacted, and compensated for the damage being done ,.

I am anxious for them to receive the permit if all things are properly
taken care of, they are nice people and I am sure things can be worked
out, but Spring River is in bad shape as perhaps you already know.

Sincerely yours

E.S. Haddock
